Column Safety Warning Details

- Health and warning signage is intended to advise customers of forecourt safety precautions, services available, and how to operate equipment.
- All safety warning signage, wording, and content should be applied in accordance with all mandatory requirements by local authority or country specific environmental regulations.
- The required Warning decal must always be placed at the top, where top of decal aligns with 7'-7" (2310mm) or with the bottom of the valance.
- Any optional or state specific decals must be stacked underneath the Warning decal.
- The required Accessibility decal must be placed at the bottom, top of Accessibility decal aligns with the bottom of the last decal in the stack. Ensure that there is no gap between any of the safety warning decals. Font should be White text if placed on Texaco Dark Gray.
- NOTE: This is for the United States region. Please contact Chevron for region specific adaptations.

NO SCOPE

Placement of Techron vinyl is estimated based on field surveys and not from a reflective ceiling plan. Actual installation placement to be determined at the time of installation. The +Techron vinyl cannot be installed unless it meets the following criteria:

Canopy Treatment and Fascia Signage

7.5 TECHRON Undercanopy Placement

Size and placement of the graphic must be between gutters/vertical drop-downs. This may mean pulling the graphics away from the corner and over to the next full bay if a gutter exists at the first column and cuts off graphic.

+TECHRON must be placed so it is readable driving into the bays.

Avoid light fixtures in the placement of graphic if possible. If not possible, then a portion of the graphic can be cut around the fixture as long as it's not the "+" or "T", which cannot be cut at all.

If the graphic is cut, a portion of the graphic must be continuous - the fixture cannot wholly interrupt any of the graphic letters.

Although the preferred design is 2 +TECHRON graphics, each on opposite sides of the canopy - the graphics must be at least half of the total width of the graphic apart from each other and at least the same height apart from each other on opposite sides.

TYPE OF CANOPY DECK LIGHT FIXTURES: LED
CANOPY CLEARANCE FROM GRADE: 17'

Identity Basics

Font and Color Specifications

Typography

A typeface should reflect a company's personality and brand as well as have strong legibility. There are two primary typefaces for the retail brand that do that:

- DIN 2014
- DIN 2014 Narrow

These typefaces were selected as a complement to one another and the other brand identity elements. They provide the flexibility needed for all our retail brand messaging and help establish a modern and approachable look that separates us from the competition. And they do this without overshadowing the Texaco Star.

Font Specifications

DIN 2014 Regular
