

Improvements on Recreation District 11

The current recreational facilities have been very well received, but they are in need of some infrastructure improvements. Adding paths, designated parking, and better facilities for the Park and Ride would contribute to make this area better for the town.

Extend Trial System Around Levenson and Keller Street and Across River

Abita Springs currently counts with Tammany Trail, which is crucial to attract people to come into Town. Still, the Town should invest in other trails across the town, for both local use and visitors who are looking to spend more time in Abita. A place to encourage bikers to deviate into town would be around Levenson and Keller Street.

Another place to extend the trail system would be around the river. During the charrette, people expressed their interest to bring river related activities back into town, such as the Morgan Swimming Pool that was once part of Abita Springs. Expanding the trail system with different viewing points, gazebo's, benches, and water access points would enhance one of Abita's most beautiful natural traits.
